

Statement made on: 23 December 2013

Dear Robert Bauval,

Again I would like to confirm to you that we did not touch the cartouche as was wrongly reported in the media. This is easily proved by checking the cartouche in the Relief Chamber.

The tiny amount was from a graffiti that was 1,5 m away from the cartouche. This graffiti is from a corner as clearly shown in the images which I sent you via Email.

Furthermore, we filmed the whole episode so that we can also prove our statement by HD footage!

Again I would like to testify that this was not our intention at all to physically damage the pyramid or denigrate the Egyptian heritage. It was also not our intention to use the samples in order to date the pyramid which is in any case scientifically to do with this sample. The main objective was led by pure scientific interest.

I appreciate your support and would like to thank you in the name of Stefan Erdmann, too.

Sincerely,

Dr. Dominique Gornitz
